EDUCATION

Ankara Science University – Software Engineering | *2022 – Present*
Activities and Roles:

- President, Development Student Club
- Social Media Head, Google Developer Student Club
- Theatre Club Member
- Music Club Member

WORK EXPERIENCE

MG Engineering – Engineering Internship | *2024*
Gained hands-on experience in engineering design processes, improving AutoCAD skills and contributing across multiple project phases.

- Preparing technical drawings using AutoCAD
- Participating in mechanical engineering projects
- Supporting engineering teams in project design processes
- Preparing technical documentation

TECHNICAL PROJECTS

Real-Time Deepfake Face & Voice Transformation System

- Developed a real-time deepfake application performing live face swapping and voice conversion on video streams
  — *Technologies: Deep Learning, Computer Vision, GANs, Real-time Video Processing, Python*

AI-Powered Personalized News Application

- Developed intelligent news aggregation platform using ML algorithms to personalize content delivery based on user reading habits
  — *Technologies: Machine Learning, NLP, API Integration*

Obesity Risk Prediction using Machine Learning

- Conducted data mining analysis applying preprocessing, feature engineering, and multiple classification models with hyperparameter tuning
  — *Technologies: Python, Scikit-learn, GridSearchCV, Model Evaluation*

AI-Powered Language Learning Platform

- Built adaptive ML system personalizing curriculum based on user performance, achieving 35% pronunciation accuracy improvement
  — *Technologies: Machine Learning, NLP, Web Development*

Global Recipe Sharing Network

- Architected scalable platform supporting 1000+ concurrent users with advanced search and multi-language support
  — *Technologies: Full-Stack Development, RESTful APIs, Cloud Infrastructure*

Smart Home Automation System

- Developed IoT control interface with voice/gesture recognition, reducing energy consumption by 28%
  — *Technologies: Embedded Systems, Real-time Processing, UI/UX Design*

Business Process Automation Framework

- Created workflow optimization framework improving process efficiency by 40% through intelligent automation
  — *Technologies: Process Mining, Data Analytics, Automation Systems*

University Course Directory Mobile Application

- Developed Android application with RecyclerView, dynamic filtering, live search, and sorting capabilities
  — *Technologies: Android Studio, Kotlin, RecyclerView, Custom Adapters*

Conference Registration & Verification System

- Built Android application with MVVM architecture, Room Database, and camera integration for participant management
  — *Technologies: Kotlin, MVVM, Room Database, LiveData, Android Jetpack*

LEADERSHIP AND COMMUNITY ACTIVITIES

President – Development Student Club | Ankara Science University | *2025 – Present*
Lead the organization of software and technology-related projects and coordinate team activities. Established and captain the project team preparing for Teknofest 2026, focused on innovative engineering and software solutions. Manage social media and promotional activities to grow community visibility and student participation.

Vice President – Tuğra Rocket Team | *2024*
Served as Vice President of the Tuğra Rocket Team, which was preparing for the Teknofest Rocket Competition. Supported the president in team management, coordinated sub-teams, and contributed to the planning and execution of rocket design and launch activities.

Social Media Head – Google Developer Student Club | *2024*
Managed digital promotion strategies and social media activities, increasing event reach and strengthening the club's visibility through effective digital marketing.

Member – Theatre Club & Music Club
Active participant in theatre productions and musical performances within the university community.

COMPETITIONS

Teknofest 2026 – Project Team Captain
Leading the Development Student Club project team preparing for Teknofest, focused on building innovative engineering and software solutions through interdisciplinary collaboration.

TÜBİTAK Project Captain | 2019
Participated in a national project competition with an innovative project and received strong appreciation from jury members, demonstrating creativity, technical competence, and problem-solving ability.

TECHNICAL SKILLS

- **Programming:** Python, Java, C++, Kotlin
- **Web Development:** HTML, CSS, PHP
- **Database:** SQL, MySQL, Relational Database Design
- **Mobile Development:** Android (Kotlin, Android Studio), MVVM, Room, Jetpack
- **AI & Data Science:** Machine Learning, NLP, Computer Vision, Deep Learning, Data Analysis (Python), Data Preprocessing, Scikit-learn
- **Algorithms:** Data Structures, Algorithm Design
- **Tools:** Visual Studio, VS Code, Eclipse, BlueJ, Android Studio, Anaconda, Git, GitHub, XAMPP, phpMyAdmin, AutoCAD

PROFESSIONAL SKILLS

- Teamwork and leadership
- Effective communication and presentation
- Problem solving and analytical thinking
- Solution-oriented approach
- Time management and planning

LANGUAGES

- Turkish — Native
- English — B1 Level
